EDUCATION

Bachelor of Science in Computer Science, University of Engineering & Technology (UET) Lahore Sep 2024 – Present
Semester: 4th | CGPA: 3.57 / 4.00
Relevant Coursework: Data Structures, Object-Oriented Programming, Computer Networks, Information Security, Database Systems, Software Engineering

SKILLS

Programming	Python, C/C++, C#, JavaScript, SQL, Bash
Web & APIs	FastAPI, REST APIs, HTML5, CSS
Networking	TCP/IP, DNS, VLANs, DHCP, NAT, ACLs, Routing Protocols, Wireshark, Nmap
Tools	Linux, Git, GitHub, VirtualBox, Cisco Packet Tracer, LaTeX
Productivity	Microsoft Word, Microsoft Excel, Microsoft PowerPoint
Soft Skills	Written & Verbal Communication, Research, Reporting, Attention to Detail

PROJECTS

Context-Aware Translation Web App 2025
Full-Stack Academic Project *UET Lahore*

- Built a full-stack web application using FastAPI, JavaScript, HTML, and CSS, integrating external REST APIs for real-time translation.
- Managed secure credential handling using environment variables and applied backend configuration best practices.
- Documented API lifecycle, client-server architecture, and deployment steps for project handoff.

Enterprise Network Architecture Simulation Spring 2025
Academic Project *UET Lahore*

- Designed and simulated a segmented enterprise network connecting a headquarters and 3 branch sites using Cisco Packet Tracer.
- Configured RIP, EIGRP, and OSPF with route redistribution across 4 locations to support dynamic inter-network communication.
- Set up VLAN segmentation, inter-VLAN routing, DHCP, dynamic NAT, and ACL policies across the entire network.
- Documented network topology, configurations, and performance findings in structured technical reports.
- Collaborated with classmates to troubleshoot configuration issues and complete all project milestones on time.

Network Monitoring & Automation Tool 2026 (Ongoing)
Information Security Lab *UET Lahore*

- Built a Python tool using Scapy to capture live network traffic, automate anomaly detection, and generate structured alerts.
- Implemented IP-MAC verification logic and baseline traffic monitoring to flag suspicious activity.
- Analyzed captured traffic using Wireshark alongside custom packet analysis scripts.

Desktop Application Development 2024 – 2025
Academic Projects (E-Commerce & Event Management Systems) *UET Lahore*

- Built two desktop applications with full SQL relational backends for inventory, user, and event management workflows.
- Designed normalized database schemas and applied parameterized queries to improve reliability and maintainability.
- Independently planned, developed, and tested each application from requirements gathering to final testing.

CERTIFICATIONS & TRAINING

- **TryHackMe Pre-Security** – Completed; hands-on labs in Linux administration, network troubleshooting, and traffic analysis.
- **TryHackMe Jr. Pentester** – In Progress; security assessment and system analysis.
- **CompTIA Security+** – Preparing; structured professional certification in information security.

EXTRA-CURRICULAR ACTIVITIES

- **Organizing Member, ITEC (UET Lahore)** – Coordinated logistics and prepared technical problem sets for coding competitions with 100+ participants.
- **Participant, ITEC & ACM UET** – Competed in programming contests and attended technical events to build skills and expand professional network.
